

BUILDING AN ECONOMY FOR OUR COMMON GOOD

In these dark times, we are coming together to shine a light on the positive actions people are taking to create an economy for the common good in our community. This can range from groups working to build the local food movement to worker owned businesses, consumer co-ops, nonprofits, community associations and beneficial government agencies.

To do this, we will be holding collaborative workshops on building an economy for our common good in Mendocino County at _____ . Please join us for this eight-workshop series where we identify the entities in _____ that are creating a sustainable, vibrant, empowering and just future for our communities. This effort is inspired and advised by the national effort of the US Solidarity Economy Network to map solidarity economy enterprises across the country. You can see their map at <http://solidarityeconomy.us/> We are creating a separate map that we plan to merge with the national map once the project is completed. Workshops will be held _____ (day, time date frequency) starting _____.

We will network all of these entities and enterprises together to strengthen all of their efforts. United we stand to make life in _____ better for all. We need your help to make it happen. Please join us in this exhilarating project identifying, interviewing and mapping entities that are working to make all life in Mendocino County ecologically, economically and socially beneficial for all.
